DELTEX COURIER & CARGO SERVICE

INTRODUCTION

Courier service is the modern, quick and secure source of mail and shipment handling as compared to postal means. Courier Service has become a back-bone of the modern life particularly for the business community. The 2nd Caliph of Islam Hazrat Umar-e-Farooq (God bless Him) was the Founder of such like services. The best sources at that time were utilized for providing mail movement through horse riders. Other nations of the time followed suit and gradually established postal system in their regimes.

The present day science has further made the courier service more faster. The business community particularly expects that mail/ Consignments reach them briskly/ overnight.
